

DIPRAJ RAY

Full Stack Developer

+91-6291652063 | raydipraj1234@gmail.com | [linkedin.com/in/dipraj-ray](https://www.linkedin.com/in/dipraj-ray) | [GitHub: Dipraj Ray](https://github.com/Dipraj-Ray) | Bengaluru, India (Open to Relocation)

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3 internships and hands-on production experience building scalable web applications using React.js, Next.js, Node.js, TypeScript, and RESTful APIs. Proficient in cloud deployments on AWS and Vercel, database design with PostgreSQL and MongoDB, and translating Figma designs into pixel-perfect, responsive interfaces. Currently pursuing B.S. Computer Science at BITS Pilani. Open to full-time Full Stack Developer roles in Bengaluru, Hyderabad, Delhi, Pune, and Gurugram.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Hono.js, REST API Design, JWT, Bcrypt, Zod, Input Validation

Databases: MongoDB, PostgreSQL, SQL, Mongoose, Prisma ORM

Cloud & DevOps: AWS (EC2, S3), Cloudflare Workers, Cloudflare R2, Vercel, CI/CD Pipelines, Cloudinary

Tools & Practices: Git, GitHub, Version Control, Figma-to-Code, Responsive Design, Performance Optimization

Languages: TypeScript, JavaScript, SQL

PROFESSIONAL EXPERIENCE

Lemon Studios | Full Stack Developer Intern

Feb 2026 – Present

- Architected and shipped end-to-end scalable full stack applications — database schema design, backend API development, and responsive frontend delivery — across multiple client-facing digital products.
- Built modular, data-driven dashboards with real-time state management using React.js and Next.js, consolidating 5+ data sources into unified interfaces and reducing client reporting time significantly.
- Designed and maintained RESTful APIs and backend services using Node.js and Express.js with input validation (Zod), error handling, and scalable routing patterns across 3+ production platforms.
- Translated Figma designs into pixel-accurate, responsive React components using Tailwind CSS, maintaining design-to-code fidelity across web and mobile breakpoints for all brand clients.
- Managed media uploads and asset delivery using Cloudinary and Cloudflare R2; deployed client applications on Vercel with CI/CD pipelines for continuous delivery.

Vehiculr | Full Stack Developer Intern

Jan 2026 – Present

- Built and maintained a full-featured vehicle listing and garage service booking platform using MERN stack, Next.js, and TypeScript, serving vehicle owners and businesses across India.
- Developed end-to-end features including service booking flows, car listing pages, search and filter functionality, and user dashboards with mobile-first responsive UI using React and Tailwind CSS.
- Built a complete admin panel with role-based access control (RBAC), enabling internal teams to manage listings, users, and service workflows with zero manual overhead.
- Designed and integrated REST APIs connecting backend business logic to React.js frontends; managed data with PostgreSQL and MongoDB, designing schemas for listings, bookings, and user profiles.
- Integrated Cloudflare R2 and Cloudinary for scalable media storage and image optimization; deployed services on Vercel and Cloudflare ensuring high availability and performance.
- Built and optimized performance-critical dashboards for operational visibility, reducing data retrieval latency through query optimization and efficient frontend state rendering.

HelioWeb | Software Engineer Intern

May 2025 – Jul 2025

- Developed and deployed RESTful APIs using Node.js and Express.js, integrating SQL and NoSQL databases with optimized queries that reduced average data retrieval time by 25%.
- Built and enhanced responsive user interfaces using React, Tailwind CSS, HTML, and JavaScript, delivering pixel-perfect components across 3 major product pages with cross-platform compatibility.
- Built secure image storage and restoration pipelines using Multer and AWS S3, handling 100% of user-generated content uploads with zero data loss incidents.

- Implemented authentication and authorization workflows (JWT, Bcrypt) across all application endpoints; coordinated with a 4-person engineering team via Git throughout a 3-month sprint.
- Deployed services via AWS EC2 and S3, ensuring scalability, reliability, and production-grade infrastructure for the student portal platform.

EDUCATION

Birla Institute of Technology & Science (BITS), Pilani

Aug 2024 – Jul 2027

Bachelor of Science, Computer Science

Kendriya Vidyalaya

Senior Secondary Certificate (XII), Computer Science

CERTIFICATIONS

Full Stack Web Development — 100xDevs 0-1 Web Development Cohort (Cohort 2)

KEY ACHIEVEMENTS

- Reduced average API data retrieval time by 25% through query optimization and efficient database indexing at HelioWeb.
- Consolidated 5+ data sources into a single unified dashboard at Lemon Studios, significantly improving client reporting efficiency.
- Shipped production-grade features across 3 concurrent internships in automotive mobility, creative digital products, and SaaS platforms simultaneously.
- Maintained zero data loss across all user-generated content pipelines using AWS S3 and Cloudflare R2 storage integrations.
- Delivered pixel-perfect, cross-browser compatible UI components across all client projects with consistent design-to-code fidelity.
